

# Watch your back.

## But if you can't, find someone who can.

- ◎ Melanoma can develop anywhere on your body
- ◎ In men, more than a third of melanomas develop on the back
- ◎ Look for new, changing, or different moles
- ◎ Make sure someone's got your back, a partner or healthcare provider!

**KNOW YOUR MOLES. WATCH FOR CHANGES. ASK YOUR PROVIDER FOR A SKIN CHECK.**
